Coolers & Wet Kits Behind Cab Mounted

Professional Wet Kit and Power Take-Off (PTO) Installations at KT Pacer!

At KT Pacer, we specialize in upgrading your vehicle's capabilities with expert Wet Kit and Power Take-Off (PTO) installations. Matching the correct PTO to transmission is critical in optimizing Hydro Efficiency and protecting your transmission for extended life. These enhancements empower your truck to operate a wide range of hydraulic equipment, boosting efficiency and versatility.

Why Invest in Wet Kits and PTOs?

- **Increased Efficiency:** Streamline your workflow by integrating hydraulic systems that allow for smoother and faster operations. Matched to the hydraulic needs of your feed body or trailer.
- **Enhanced Performance:** Ensure your truck delivers optimal power to auxiliary equipment, maintaining consistent and reliable performance across all tasks.

Our Expertise:

At KT Pacer, our experienced technicians provide:

- **Customized Installations:** We tailor Wet Kit and PTO setups to your truck's specifications, ensuring seamless integration and functionality.
- **Quality Components:** Utilizing top-grade materials and parts, we guarantee durable and long-lasting installations that withstand rigorous use.
- **Comprehensive Support:** From initial consultation to post-installation maintenance, our team is dedicated to supporting your needs every step of the way.

Featured Equipment: *Thermaflow SS980HFT, Dakota DSC-60, and Force America UK12-70*

To maximize your hydraulic system performance, we recommend the **SS980HFT, DSC-60, or UK12-70**. These heavy-duty compact cooling systems are designed for either behind the cab to keep it away from road debris and ensuring efficient operation, or for the Dakota DSC-60 and Force America UK12-70, frame rail mounting for placement convenience.

SS980HFT Specifications

- *Flow Rate: Up to 80 GPM*
- *Reservoir Capacity: 9.4 gallons*
- *Cooling Capacity: 70 HP @ 60 GPM with 80° exit differential*
- *3000 PSI standard max pressure*
- *Hydraulic Fan (3 GPM)*
- *Extends Hydraulic Component Life*
- *Construction: High-quality, corrosion-resistant stainless steel*
- *Mounting: Behind-the-cab installation*
- *Filter: 25 Micron Absolute filter with bypass suitable for piston pump and motor applications*

Ready to Upgrade?

Don't let your truck's potential go untapped. Contact KT Pacer today to discuss how our Wet Kit and PTO installation services can elevate your operations.

Visit our website at ktpacer.com or call us at **319.449.3932** to schedule an appointment.

Empower your fleet with KT Pacer — where innovation meets performance!

Coolers & Wet Kits Frame Rail Mounted

DSC-60 Specifications

- Flow Rate: 60 GPM
- Reservoir Capacity: 12 Gallons
- Cooling Capacity: 65 HP @ 60 GPM with 80° exit differential
- 3000 PSI standard max pressure
- High efficiency cooler with hydraulic driven fan and 60 PSI bypass
- Construction: Aluminum Frame
- Mounting: Behind Cab or Frame Rail
- Sight Level Gauge/Temperature Gauge
- Filter: 10 Micron Cartridge Filter

UK12-70 Specifications

- Flow Rate: 80 GPM
- Reservoir Capacity: 12 Gallons
- Cooling Capacity: 65 HP @ 60 GPM with 80° exit differential
- 3000 PSI standard max pressure
- Hydraulic fan
- Construction: Powder Coated Steel
- Mounting: Behind Cab or Frame Rail
- Filter: High flow 10 Micron with 25 PSI Bypass
- Sight Level Temperature Gauge
